Chromaclone® PVS — a lasting impression

Chromaclone PVS captures even the smallest details, enabling you to make effective impressions the first time, every time. Its extremely low contact angle allows it to flow deep into the sulcus for highly visible margins. And its superior tear resistance and elastic recovery keep Chromaclone PVS dimensionally stable for weeks, so you can pour at your convenience.

- Easy-to-use thixotropic formula
- Super hydrophilic
- Highly accurate, even with multiple pours
- Four viscosities for tray impressions
- Clone Bite for bite registration
- Fast (two-minute) and Regular (three-minute) set times
- Delicious Bubble Gum flavor **YUM!**
