

【Product Name】 10ul Pipette tips(YPT0010-T-F-SL)

【Product classification and nomenclature】

According to its capacity, pipette tips can be divided into 1250ul, 1000ul, 500ul, 300ul, 200ul, 100ul, 50ul, 20ul and 10ul; Pipette tips can be divided into universal pipette tips and robotic tips, dependent on the matching apparatus. The universal tips is matched to a lab pipette and the robotic tips is used for automatic liquid workstation. Robotic tips can be further divided into regular or conductive tips based on their conductivity of the tips. Robotic tips can also be categorized into different types according to its matching automatic liquid workstation. Our company currently carries the following tips: The robotic tips includes TECAN 1000ul pipette tips, TECAN 200ul pipette tips, TECAN 50ul pipette tips, Hamilton 1000ul pipette tips, Hamilton 300ul pipette tips and Hamilton 50ul pipette tips.

The universal pipette tips includes 1250ul pipette tips, 1000ul pipette tips, 200ul pipette tips, 100ul pipette tips, 20ul pipette tips and 10ul pipette tips.

【Materials】

High quality polypropylene or polypropylene with low retention properties; The robotic tips can be made from polypropylene with conductive property.

【Intended use】

Pipette tips are widely used in the research and development of biology, genomics, protein science, immunology, metabolomics and biopharmaceuticals.

【Instructions for Use】

The universal pipette tips can match the pipette of the laboratory for quantitative pipetting, and the automatic pipette tips can perfectly match the multi-channel head of the automatic liquid workstation to achieve high-precision and high-throughput rapid pipetting. Follow the SOP of lab procedure or the instruction of automatic liquid workstation. The matching of the tips with the pipette and workstation apparatus should be secured without any leakage.

【Contraindication】 Not applicable

【Product Features】

- 1、Autoclavable under 121 °C, 20 psi, 20 minutes without deformation;
- 2、Using high purity polypropylene (PP) raw materials, with excellent chemical corrosion resistance;
- 3、Manufactured by high-speed electric injector to ensure high quality with wall smoothness and excellent verticality;
- 4、Manufactured in Class 100000 clean room, certified RNase / DNase and pyrogen free;
- 5、Universal pipette tips match perfectly to main brand pipette. Robotic tips fit the workstation perfectly with good sealing and no leakage;
- 6、Each package has its own product number and batch number for quick tracking and product traceability.

【Shelf life】

Three years. The production date and batch number are shown in the package.

【Storage and Transportation】

The product can be stored in a cool, dry and well ventilated clean environment.

【Packaging Information】

96 Pcs/ Box, 50 Boxes/Carton, 4800Pcs/Carton.

48*27*28cm/CTN

【Symbols and Interpretations】

	Attention, see instruction for use
	Batch code
	Use-by date
	Manufacturer
	Do not use if package is damaged
	Authorized Representative in the European Community
