

## HOW TO USE DISPOSABLE PRESSURE TRANSDUCER

The purpose of connecting and monitoring the patient's blood pressure in the following cases:

- + Prolonged shock/severe hypotension
- + Risk of hemodynamic disturbances during and after surgery (especially heart and large vessel surgery).
- + In case of dengue fever (grade III, IV with re-shock), hand, foot and mouth disease (grade III, IV), severe myocarditis...
- + Cannot measure BP manually.
- + All cases of shock.
