

VITROLiFE LABWARE

Labware created and dedicated for use in IVF. Safe, efficient and certified.

Safe environment from aspiration to transfer

Vitrolife Labware gives you the possibility to use a high quality, extensively tested environment for your gametes and embryos through all the steps of an IVF procedure.

Designed for you

Vitrolife Labware is designed to support you throughout the IVF workflow with products developed for each procedure. The improved design makes your way of working efficient and

Meeting regulatory requirements

The complete product line of Vitrolife Labware is CE-marked exclusively for IVF, which means that they are tested for and compliant for use in IVF procedures.

Pure control

As with all products from Vitrolife, our new range of labware is extensively tested and ready-to-use. We have strict selection criteria. Only the very purest raw materials that pass the sensitive MEA are selected for production
